Commercial kitchen fires can start within seconds and become highly destructive at an alarming speed. Traditional methods of using portable fire extinguishers and fire blankets require immediate human intervention. An Ansul R102 system from Ultra Surefire will automatically extinguish the fire within seconds, with a unique low pH liquid. Ansul systems are widely accepted by insurers and used by restaurants and hotels within the UK leisure industry.

Installed over kitchen appliances, nozzles and detectors are strategically located to provide adequate discharge of Ansul liquid to automatically extinguish a potential hazardous fire within seconds. A unique low pH liquid fire suppression is piped to the nozzles, and can be discretely located to aid the aesthetics of the kitchen.

Ultra Surefire provide a comprehensive design and installation service to many restaurants and commercial kitchens within the UK. Out of hours installation and maintenance can be accommodated to fit in around your requirements. Technicians are fully trained to Ansul standards, and hold extensive stock for any emergency.
