SAFETY AND CERTAINTY
30 years in the making

Mechanical and electrical fire systems play a vital role on the long term value of a building, and protecting users throughout the property lifecycle: Ultra Surefire’s 30 year legacy sets the agenda in solution, design and implementation of fire systems to compliment your building fire strategy. Our unified approach delivers bespoke and innovative fire technology which is efficient, sustainable and cost-effective.

Ultra Surefire have built an enviable reputation for high quality delivery and engineering excellence across a broad range of high performance detection, extinguishing and suppression systems. Our solid engineering expertise has made us the first choice for sensitive projects, such as heritage properties, banking institutions and the emergency response services.

Pioneers in Fire Technology

Fire technology moves at a fast pace, ensuring that systems and equipment are tested correctly and as pioneers within the water mist field, Ultra Surefire were the first company to test successfully to new British Standards; actively working with industry bodies such as BSI, BRE and European Committees to develop product standards and improve engineering practices within the industry.

PROJECT MANAGEMENT YOU CAN TRUST

Recognised as a leading innovator, Ultra Surefire support clients to meet their fire safety requirements. We will:

- Assess your fire risk for correct solution
- Provide advice and technical support
- Design a system to meet your requirements and fulfil your legislative responsibilities
- Value engineer your proposal for cost benefits
- Implement a project programme around your schedule
- Support you once the system is in place through our 24/7 maintenance and emergency response division
