

Integrated Fire Protection Solutions

Education Risk

0845 600 8330

www.ultrasurefire.co.uk

Ultra Surefire have built an enviable reputation based on innovation, research and development.

From advice and survey through to design and project management, Ultra Surefire will be with you every step of the way.

Our quality and approvals include:

- ISO 9001
- LPS 1048
- FIRAS
- SafeContractor
- Constructionline
- BAFSA members

Every one of our team are chosen for their experience and knowledge in the fire industry, making it a winning combination. We can support you with:-

- Water Mist Systems
- Sprinkler Systems
- Gas Suppression
- Dry Risers
- Ansul Suppression
- Fire Detection Systems

Ultra Surefire Limited

More than one fire a day is started in education, posing a huge risk to pupils and staff. According to government estimates (DCLG), the average cost of school fires is £58 million per year. The impact of these fires are significant, and can have a devastating effect on the community, students, teachers and families, especially when over half of these fires are occurring when the schools are occupied.

Installing automatic fire protection to allow for a speedy means of escape is vital. CFOA (Chief Fire Officers Association) believes if automatic fire protection systems are considered at the design stage of new build or refurbishment of existing buildings, then build costs can be kept to a minimum.

Our dedicated schools design and engineering teams can provide solutions for schools, academies, universities and colleges. Providing invaluable support to the project design team, we can ensure that our sprinkler systems give greater design flexibility for travel distances, compartmentation allowances and numbers of exit routes. Systems can be installed during major building construction or out of hours with full programmable schedules.

Challenging environments such as atriums, building construction techniques and decorative interiors are supported by our in-house design team.
