

Integrated Fire Protection Solutions

Healthcare Risk

0845 600 8330

www.ultrasurefire.co.uk

Ultra Surefire have built an enviable reputation based on innovation, research and development.

From advice and survey through to design and project management, Ultra Surefire will be with you every step of the way.

Our quality and approvals include:

- ISO 9001
- LPS 1048
- FIRAS
- SafeContractor
- Constructionline
- BAFSA members

Every one of our team are chosen for their experience and knowledge in the fire industry, making it a winning combination. We can support you with:-

- Water Mist Systems
- Sprinkler Systems
- Gas Suppression
- Dry Risers
- Ansul Suppression
- Fire Detection Systems

Healthcare facility managers often have to overcome challenges to evacuate patients effectively, provide protection to wards and areas of the building or simply to look at alternative solutions to structural changes. Fire protection systems can be used as solutions for many dilemmas, such as elimination of a secondary means of escape, extension of travel distances or a reduction in fire resistance compartmentalisation.

Ultra Surefire have successfully installed both sprinkler and water mist systems into hospitals and care homes, either within a new build or retrofitting to older properties. Phased installations and good housekeeping is the key to our success, especially when integrating our work with patient and other hospital services. Working with these challenges, Ultra Surefire have overcome many issues to deliver water mist and sprinkler systems to protect wards, corridors and escape routes in a variety of NHS hospitals, Care Homes and Health Trusts. Kitchen facilities can also pose a high risk, particularly within care homes where kitchen appliances are used throughout the day. Fire can start within seconds and become highly destructive at an alarming speed. An Ansul R102 system from Ultra Surefire will automatically extinguish a fire within seconds.

An holistic approach from Ultra Surefire adds value from initial design concept to project implementation. An ethos of best practise, standards, quality and health & safety are applied to every project. Our team can advise you on fire legislation, water supply requirements, pipework layouts and integrating with detection systems for total building protection.
