

Integrated Fire Protection Solutions

Waste, Recycling &
Renewable Energy Risk

0845 600 8330

www.ultrasurefire.co.uk

Ultra Surefire have built an enviable reputation based on innovation, research and development.

From advice and survey through to design and project management, Ultra Surefire will be with you every step of the way.

Our quality and approvals include:

- ISO 9001
- LPS 1048
- FIRAS
- SafeContractor
- Constructionline
- BAFSA members

Every one of our team are chosen for their experience and knowledge in the fire industry, making it a winning combination. We can support you with:-

- Water Mist Systems
- Sprinkler Systems
- Gas Suppression
- Dry Risers
- Ansul Suppression
- Fire Detection Systems

Ultra Surefire Limited
Unit 4, Barnes Wallis Court,
Wellington Road,
High Wycombe, Buckinghamshire,
HP12 3PS

Fire within recycling, waste management and renewable energy facilities continues to be a major problem with an average of once every day, according to figures from the Environment Agency. Fires can sometimes escalate to epic proportions with huge risks to the public, fire fighters and the waste management facility.

Recycling, renewable energy and waste management companies are always concerned about the risks of fire and looking for a solution to implement a fixed fire fighting system capable of mitigating against such future occurrences, consequential loss and disruption to customers.

As this is a scenario not readily catered for by any existing suppression standard or specification, a bespoke fire engineered solution is often required. By integrating electronic fire detection with water mist fire suppression, a solution has been created to suppress a fire which will halt any further fire development and allow sufficient time for fire and rescue service intervention. Our fire engineered solution has been tested and verified by the FPA (Fire Protection Association), along with a comprehensive range of fully tested products to provide our clients with the correct fire protection solution.

Our team have worked hard to develop a system capable of suppressing a fire in these diverse applications for general use by recycling and waste organisations. Recognised as leading innovators, Ultra Surefire are pioneers within the water mist field and actively work with industry bodies to develop product standards and improve engineering practices.
